#### A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events, outbreaks of disease or pandemics (such as COVID-19), and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.

The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2023

## **Management Discussion of Fund Performance**

June 5, 2023

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments that have affected the Fund's performance and outlook in the year ended March 31, 2023 (the "period"). If the Fund was established during the period, "period" represents the period since inception.

In this report, "Mackenzie" and "the Manager" refer to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Please read A Note on Forward-Looking Statements on the first page of this document.

## **Investment Objective and Strategies**

The Fund seeks income and some long-term capital growth by investing primarily in other mutual funds that invest in Canadian and foreign equities, fixed income securities and other asset categories, although it may also invest in securities directly. The Fund's asset mix will generally range between 15%–35% equities and 55%–85% fixed income securities. The Fund diversifies in terms of geographic exposure, equity factor exposure, sector exposure, company market capitalization, portfolio manager style, credit quality and duration.

### Risk

The risks of the Fund remain as discussed in the Fund's Simplified Prospectus.

The Fund is suitable for medium-term investors looking for a managed asset portfolio fund to hold as a key part of their portfolio, who can handle the volatility of stock and bond markets, and who have a low tolerance for risk.

### Results of Operations

### **Investment Performance**

The performance of all series in the current and previous periods is shown in the *Past Performance* section of the report. Performance will vary by series primarily because fees and expenses differ between series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series. The following comparison to market indices is intended to help investors understand the Fund's performance relative to the general performance of the markets. However, the Fund's mandate may be different from that of the indices shown.

During the period, the Fund's Series A securities returned -3.1%, and Series LB securities returned -3.2% (after deducting fees and expenses paid by the series). This compares with a return of -2.0% for the Fund's broad-based index, the FTSE Canada Universe Bond Index, and a return of -2.4% for a blended index.\* All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in the index returns.

Global and Canadian equities fell over the period in local currency terms, driven lower by rising interest rates, volatile commodity prices and forecasts of economic weakness. Employment remained strong, and persistently high inflation led many global central banks to raise their policy rates significantly. Higher interest rates

contributed to a crisis in the U.S. banking system in March. In Canada, consumer spending was resilient. In fixed income, global yields rose sharply, and Government of Canada bond yields increased, particularly among shorter-term bonds. Volatility in fixed income markets was heightened by the magnitude of central bank policy actions and by geopolitical tensions.

Within the MSCI AC (All Country) World (Net) Index, Turkey, Greece and Denmark were the strongest-performing markets in Canadian dollar terms, while Colombia, the United Arab Emirates and Qatar were the weakest. The energy, consumer staples and industrials sectors were the strongest performers, while real estate, communication services and consumer discretionary were the weakest.

Within the S&P/TSX Composite Index, consumer staples, consumer discretionary and industrials were the strongest sectors, while health care, real estate and financials were the weakest.

The following discussion reflects the Fund's allocation decisions and the activities and performance of its underlying investment funds and other directly held securities. The Fund underperformed the broad-based index because of its allocations to Canadian equities and global fixed income, which underperformed Canadian fixed income in the period. Given the Fund's mandate, the return of the blended index is a more meaningful comparison.

The Fund underperformed the blended index, with underweight exposure to fixed income detracting from performance. The Fund's cash position contributed to performance as markets declined.

Within the fixed income portion of the Fund, holdings in government bonds detracted from performance. Security selection in corporate bonds in the securitization and infrastructure sectors contributed to performance.

Within the equity portion of the Fund, overweight exposure to the health care sector detracted from performance. Stock selection in Canada and the United States contributed to performance. In sector terms, stock selection in financials and underweight exposure to information technology contributed to performance.

The Fund's foreign currency exposure is actively managed to help mitigate risk and take advantage of opportunities at the total portfolio level. During the period, currency activities contributed to performance.

Over the period, the portfolio management team decreased exposure to Canada, including exposure to federal bonds, in favour of increased foreign exposure, particularly to the United States, in order to increase the Fund's diversification and opportunity set. Within the fixed income portion of the Fund, exposure to corporate bonds was increased based on their favourable risk-reward characteristics. Changes to the portfolio included the elimination of the position in Mackenzie Canadian Equity Index ETF.

#### **Net Assets**

The Fund's net assets decreased by 23.7% during the period to \$927.1 million. This change was composed primarily of \$42.7 million in net losses (including any interest and/or dividend income) from investment performance, after deducting fees and expenses, and a decrease of \$244.6 million due to net securityholder activity (including sales, redemptions and cash distributions).

### Fees and Expenses

The management expense ratio ("MER") for each series during the year ended March 31, 2023, was generally similar to the MER for the year ended March 31, 2022. Total expenses paid vary from period to period mainly as a result of changes in average assets in each series. The MER for Series D decreased due to

<sup>\*</sup> The blended index is composed of a 65% weighting in the FTSE Canada Universe Bond Index (returned -2.0%), a 12.5% weighting in the MSCI AC (All Country) World (Net) Index (returned 0.2%), a 12.5% weighting in the S&P/TSX Composite Index (returned -5.2%) and a 10% weighting in the ICE BofA Global Broad Market (Hedged) Index (returned -5.4%).

a decrease in the management fee rate effective April 4, 2022, as noted in the *Fund Formation and Series Information* section of the report. The MERs for all series are presented in the *Financial Highlights* section of this report.

### Recent Developments

Late in the period, global economic growth picked up, supported by a warm winter in Europe and the end of China's "zero-COVID-19" policy. The Mackenzie Multi-Asset Strategies team expects that over the coming months, the U.S. economy will continue overheating and the global macroeconomic environment will remain one of high inflation and resilient growth. The team believes China's reopening, if successful, will both keep global inflation elevated and support the global economy. At period-end, improving Purchasing Managers' Index and transportation data suggested the Chinese economy was strengthening slowly but surely.

The team believes that as a result of the March banking crisis, the U.S. Federal Reserve will be more hesitant to aggressively raise interest rates to bring inflation down. In Canada, if inflation remains above 2%, strong employment continues and the housing market responds to the pause in the Bank of Canada's cycle of interest rate increases, the team does not expect lower rates despite market expectations for cuts in summer 2023.

Effective March 31, 2023, KPMG LLP was appointed as the auditor of the Fund.

### Related Party Transactions

#### **Management and Administration Services**

For each applicable series, the Fund paid management fees and administration fees to the Manager at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Prospectus. In return for the administration fees, the Manager pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not included in management fees. See also *Management Fees*.

#### Other Related Party Transactions

At March 31, 2023, Mackenzie had an investment of 0.03 million in the Fund (less than 0.1% of the Fund's NAV).

During the period, the Fund received \$0.2 million in income distributions from investments in exchange-traded funds ("ETFs") managed by Mackenzie to offset fees paid within those ETFs. There is no assurance that these distributions will continue in the future.

The Manager relied on an approval provided by the Mackenzie Funds' Independent Review Committee to appoint KPMG LLP as the auditor of the Fund, effective March 31, 2023.

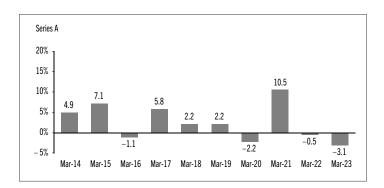

#### **Past Performance**

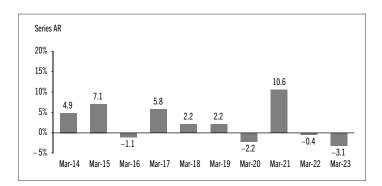

The Fund's past performance information is presented in the following charts and table. It assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The charts and table do not take into account sales, redemption, distribution or optional charges, or income taxes payable by any investor that would have reduced returns. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

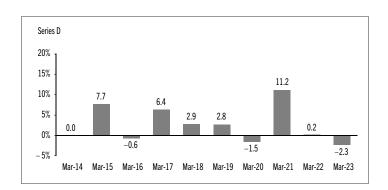

If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional securities of the Fund. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

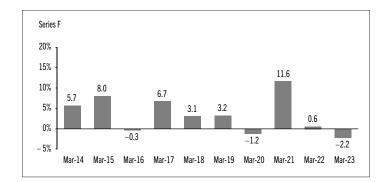

### Year-by-Year Returns

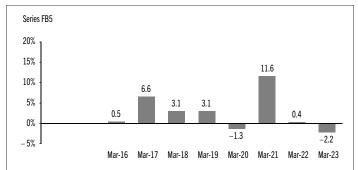

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

#### Annual Compound Returns

The following table compares the historical annual compound total returns for each series of the Fund with the relevant index or indices shown below for each of the periods ended March 31, 2023. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in these performance figures.

All index returns are calculated in Canadian dollars on a total return basis, meaning that all dividend payments, interest income accruals and interest payments are reinvested.

The blended index is composed of 65% FTSE Canada Universe Bond Index, 12.5% MSCI AC (All Country) World (Net) Index, 12.5% S&P/TSX Composite Index and 10% ICE BofA Global Broad Market (Hedged) Index.

The FTSE Canada Universe Bond Index is a broad measure of Canadian bonds with terms to maturity of more than one year. It includes federal, provincial, municipal and corporate bonds rated "BBB" or higher.

The MSCI AC (All Country) World (Net) Index represents large- and mid-cap equity performance across 23 developed and 24 emerging markets. Net total returns are calculated after the deduction of withholding tax from the foreign income and dividends of its constituents.

The S&P/TSX Composite Index is a capitalization weighted index that represents some of the largest float adjusted stocks trading on the Toronto Stock Exchange.

The ICE BofA Global Broad Market (Hedged) Index tracks the performance of investment grade debt publicly issued in major domestic and eurobond markets, including sovereign, quasi-government, corporate, securitized and collateralized securities. Qualifying bonds must be rated "BBB" or higher and have a remaining term to maturity of at least one year. The foreign currency exposure is hedged to the Canadian dollar.

- (1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences, if any, can be found in the Notes to Financial Statements.
- (2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.
- (3) Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

- (1) This information is provided as at the end of the fiscal period shown.
- (2) Management expense ratio ("MER") is based on total expenses, excluding commissions and other portfolio transaction costs, income taxes and withholding taxes, for the stated period and is expressed as an annualized percentage of daily average net assets during the period, except as noted. In the period a series is established, the MER is annualized from the date of inception to the end of the period. Where the Fund directly invests in securities of another fund (including exchange-traded funds or "ETFs"), the MERs presented for the Fund include the portion of MERs of the other fund(s) attributable to this investment. Any income distributions received from ETFs managed by the Manager, with the intention of offsetting fees paid within those ETFs but which are not considered to be duplicative fees under regulatory requirements, are treated as waived expenses for MER purposes. The Manager may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs incurred as an annualized percentage of daily average net assets during the period. Where the Fund invests in securities of another fund (including ETFs), the TERs presented for the Fund include the portion of TERs of the other fund(s) attributable to this investment.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

## **Management Fees**

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by the Manager to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. The Manager also used the management fees to fund sales commissions, trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

LBC Financial Services Inc. ("LBC") is the principal distributor for the LBC series securities of the Fund (as listed under *Fund Formation and Series Information*) and receives a portion of the management fees that the Fund pays to the Manager. Under this arrangement, LBC was entitled to approximately 25% of the total management fees that the Manager received from the LBC series of all Mackenzie funds during the period. The Manager is responsible for paying all distribution-related payments to LBC-authorized dealers whose clients invest in the LBC series of the Fund.

The following dealers affiliated with the Manager may be entitled to distributionrelated payments from the Manager on the same basis as unrelated registered brokers and dealers: IPC Securities Corporation, Investors Group Securities Inc., IPC Investment Corporation and Investors Group Financial Services Inc.

The Manager used approximately 42% of the total management fee revenues received from all Mackenzie funds during the period to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 40% of the management fees paid by all applicable series of the Fund during the period. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions and sales commissions paid for that series.
